

BESPOKE TIMBER SPECIALISTS

BESPOKE TIMBER SPECIALISTS

BESPOKE TIMBER SPECIALISTS

FOR THAT INDIVIDUAL LOOK, FIT AND FEELING - BETTER MAKE IT KATELL.

When you're planning to furnish a space, it's essential that the solution fits not only the dimensions, but also your vision, your brand, your budget and what people using the space naturally expect. A standardised product can never be quite right. Not if you care about perfection.

That's the difference with Katell, the bespoke timber specialists. We'll make it individual in looks, fit and feeling. From first discussion to final fitting, we have the skills, the scale, the talent and the technology to deliver that vision in every detail.

Above all, we have the experience. Since 2001 Katell has made its name amongst leading architects, interior designers, shopfitters and retailers as a number one supplier of custom designed and crafted furniture across the market – hotels, restaurants, bars, shops, care homes and business environments.

FREE IN-HOUSE DESIGN MAKES A WORLD OF DIFFERENCE

FOR KATELL YOUR IMAGINATION IS JUST THE START. WE'LL MAKE IT REAL; AND WE'LL MAKE IT WORK.

What do Katell mean by bespoke timber solutions? Simply this. We take the concept you have in mind – whether precisely defined or imagined – and work with you to apply our design, manufacturing capacity and craft skills to bring it into real use in real places and spaces.

OUR PRODUCTS

We consistently monitor trends to offer the latest styles for furniture. Colours, door types, new gadgets and appliances are aspects which inform our design team's work, so that you benefit from the most up to date innovations and keep your settings distinctive.

OUR RANGES

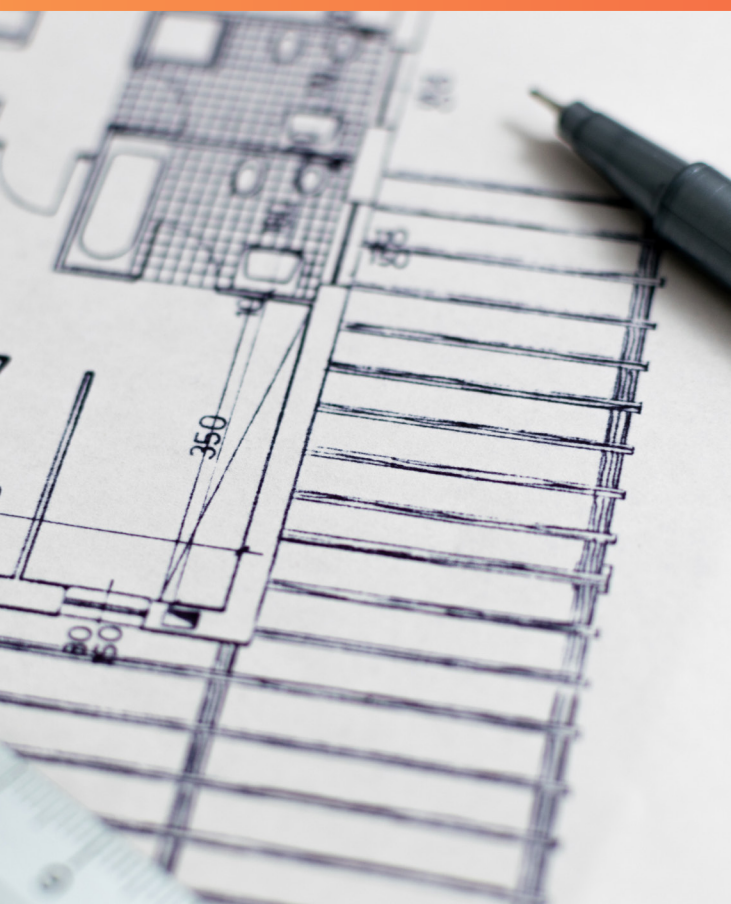

We make it your way. Katell can manufacture either to your exact design requirements or we will be delighted to work with you to create a solution inspired by your imagination that works like a dream in every dimension.

OUR SERVICE

It's in our DNA. We are driven by a commitment to provide the best possible service for our customers. Whatever your request our mission is to ensure we deal with it to your complete satisfaction.

OUR TEAM

With a full team of in-house designers, craftspeople and installers we do not out-source any of our work. This guarantees your own high standards are met at every stage of your project. We stand out from other companies because we make to measure, not to fit. All our furniture is hand finished to exacting standards.

IN HOUSE DESIGN

A solution that looks and works just the way you want doesn't happen by chance. It happens by design. You can happily entrust our in-house design team to manage your bespoke timber project from initial brief to final installation. It's all part of Katell's uniquely comprehensive service.

The design team provide the creativity and expertise to conceive and build outstanding products in a highly competitive market. Always taking an innovative approach and employing Solidworks and CAD software, the team develops a concept that combines flair with functionality to match your needs.

The vision is then implemented by our own local, Katell trained, superbly skilled workforce who meticulously craft the final timber product, guided by experience and using the latest CNC machinery.

HOW WE BUILD THE PERFECT RESULT STEP BY STEP

Customers choose Katell because our proven but simple process ensures their project stays on track, on time and on budget.

STEP 1 - CONTACT

1

To start on your bespoke journey, simply contact us with your initial ideas and explain your needs. You can be assured of a professional approach. We'll gladly discuss outline costs and can advise how to maximise your investment.

STEP 2 - UNDERSTANDING

2

In presenting your ideas, it helps to give us a feel for the size and scale of your project. Ideally provide scale drawings, but we'll gladly work from any basic dimensions you supply. It's important to outline your ambitions for the final product and the timescale, so we can fulfil your expectations.

STEP 3 - DESIGN

3

Based on your brief, our design team will create detailed drawings showing all the specific elevations and prepare a full quotation. Timings depend on the project's scale, but you can rely on us to respond with all possible speed. Once you have reviewed the drawings and quote we can refine the design if need be.

BRITISH THROUGH AND THROUGH

Being UK based is more than a matter of pride.

STEP 4 - DEVELOPMENT

4

Once the design and concepts are agreed, the design team will create 3D renders to help you visualise the end-result and enable us to work with you to confirm the detail. Often our skilled joiners will work on creating a prototype of your furniture. This brings the project to life with all the design elements in place so you know exactly what your finished product will be like.

STEP 5 - CONSTRUCTION

5

Once you have approved all the detail and confirmed the order, we will schedule the job for construction and completion and finalise a time for delivery and installation. We'll keep you informed every step of the way so you're confident of progress.

STEP 6 - DELIVERY AND INSTALLATION

6

Your finished bespoke product will be carefully packed and delivered to where you specify. If it needs to be dismantled for transport, our team of fitters will be on hand to put it back together on site. We will check every component and leave only once everything is complete and tidy.

STEP 7 - QUALITY

7

We check detail every time and our reputation depends on delighted customers. We may ask you for feedback once the job is completed to help us maintain our high standards and to continually improve our processes.

Research, design, development, sourcing, manufacture and distribution are all controlled in-house at our County Durham headquarters. We're perfectly placed to honour our promises and with room for expansion, Katell will always have the capacity to handle a growing volume of projects.

NOTHING BEATS KATELL CAPABILITY

STYLING LEADING EDGE BESPOKE TIMBER SOLUTIONS ACROSS MANY MAJOR SECTORS

See for yourself what Katell can accomplish. These pages portray the latest examples of the variety, quality and original design which Katell has been providing for architects, interior designers, developers, shopfitters and direct to customers for over 17 years.

From fitted bathroom and bedroom furniture to showroom display counters and bar environments, it is vivid proof of the application of the Katell bespoke team's vast range of experience and breadth of capability.

SHOPFITTING

High profile retailers rely on Katell to create displays tailor-made to enhance the appeal of the merchandise itself, and compliment the brand image of the retailer. Fashion, sporting goods, household - whatever you stock we can design and create bespoke retail units and cabinets exactly to your specification with that extra Katell quality.

RESTAURANT AND BAR FURNITURE

Few settings are as demanding on furniture as bustling bars, restaurants, cafes, and pubs. Not only must the furniture and fittings withstand heavy use without looking worn, it must reflect the brand values of the establishment and appeal to customers.

Katell has all it takes to respond to the challenge with style and quality. We have designed, made and fitted bespoke solutions specified by some of the most successful names in the sector. Furniture includes solid timber tables, bar stools and decorative wall panelling to complement every environment from futuristic to contemporary to traditional.

The range is impressive. Katell has manufactured portable waiter stations, radiator covers and cabinets as well as curved bar tops and drinks cabinets - all individually crafted to suit the style and ambience of the location.

Just tell us your requirements. Our skilled craftsmen are well versed in working with the architects and builders to create a result that works on every dimension.

NOTHING BEATS KATELL CAPABILITY

PROPERTY REFURBISHMENT

In the competitive commercial world and the high pressure high street, your premises must shine out. That's where Katell comes into its own. We create furnishing and fittings that work hard to maximise the productivity of every centimetre of space whilst complementing the corporate identity of the client.

You will benefit from Katell's long experience of working closely with many of the UK's leading shopfitters and interior designers to create bespoke furniture in timber.

For national and international hotel names Katell has created bespoke wardrobes, reception desks, function room bars and meeting room furniture entirely in keeping with the distinctive quality ambience that guests and delegates expect.

CARE HOME ADAPTATIONS

Katell has been instrumental in the design and manufacture of bespoke furniture particularly suited for care and residential and retirement homes.

This draws on our experience as one of the fastest growing manufacturers of quality fireplaces and heating equipment in the UK and as one of the largest suppliers into the UK's Social Housing market.

We pride ourselves on creating innovative products through clever design and flexible manufacturing - from fireplaces with specialist high level controls through to kitchen servers, coffee bars and dining areas.

Every piece is designed and constructed in materials proven to withstand the rigours of a care home environment. But we go further. The bespoke furniture has a dimension of quality and comfort that puts residents at their ease, helps staff to perform their roles more easily and provides lasting value for money.

REMINISCENT & RETRO FURNITURE

With over 80% of care home residents living to some degree with dementia and its effects, reminiscent furniture is growing in importance to help residents and carers manage this condition. The idea is that furniture which reflects the look and feel of the Pre and Post-War world will bring back to life the bygone eras when people were in their prime.

In recent months Katell has been proud to manufacture and supply bespoke furniture for Care Homes and new build projects, designed and crafted in loving period detail. This range includes kitchen cabinets, bar areas and memory boxes, all created in retro styles to stimulate and reassure residents and to help carers share and build on the therapeutic experience.

WARDROBES

Storage solutions are a Katell speciality, made to measure since 2001 for demanding housing developers and local authorities who insist upon quality, and affordability.

We have built up a high performing, experienced and probably unique team of designers, workshop craftsmen and installers committed to creating unique handcrafted furniture of proven worth.

From a basic sliding wardrobe to a fully fitted dressing room, we provide the complete solution. We have ample manufacturing facilities to cater for whatever quantities developers require. Every wardrobe and drawer unit is handmade to your precise requirements. The vast range of size and finish options include all the inner fittings and shelving required.

FIREPLACES

Katell has been manufacturing fireplaces for over 15 years and is a leading supplier to local authorities and housing developers across the UK.

Capable of manufacturing bespoke sizes in many different timber and painted finishes, our expertise allows us to manufacture exactly to your requirements.
